Professional Summary

Software Engineer with 5+ years of experience. Specializing in software quality, API validation, functional testing, database manipulation, troubleshooting and system integration. Experienced collaborating with distributed engineering teams and direct communication with customers across different regions/timezones.

Skills

Software Quality • API Validation • Functional Testing • System Integration • Troubleshooting • Customer Collaboration • SQL • REST APIs • SOAP • SOAP UI • Linux • JavaScript • Java • Python • Shell • HTML • XML • Git • Jira

Experience

Amdocs, Software Engineer

Jan. 2021 – Present

- Validated hundreds of features, APIs and business workflows before customer acceptance, ensuring production readiness across international telecom projects.
- Investigated issues through log analysis, handling Linux environments and SQL manipulation to identify root causes.
- Performed functional and regression validation after software fixes.
- Performed functional validation across UI and API layers, combining manual verification and automated API validation using SOAP UI and Groovy scripts.
- Created tools and scripts to automate log analysis using Shell and Python.
- Served as the technical point of contact between engineers and customers during software delivery and production readiness activities.
- Participated in two international Go-Live projects including hypercare support.
- Supported telecom operators while maintaining SLA commitments.
- Worked in Agile/Scrum environments, participating in stand-ups, sprint planning, and refinement sessions.

QW3 – Digital Technologies, Software Engineer Trainee

Sep. 2020 – Dec. 2020

- Developed web applications using Ruby on Rails.

University of São Paulo (USP) / CNPq, Researcher

Aug. 2018 – Oct. 2023

- Conducted research in Computer Science during the Master's Program

Education

MS University of São Paulo (USP) – ICMC

2018–2023

BS Minas Gerais State University (UEMG)

2014–2018
